n = 0.3
n = 0.5
n = 0.7
(a) n′ = h_p(n)
(a) pn
(b) h_p^{-1}(n̂′), p known
(b) h_p̂^{-1}(n̂′), p̂ with 10% error
(a)
fitted n̂′ (recorded incidents)
recording probability p
(b)
corrected n̂
recording probability p
(c)
RMSE of corrected n̂ (n = 0.5)
p known
error 10%
error 30%
error 50%
floor (dashed)
recording probability p
(d)
branching ratio
fitted n̂″
h_p̂^{-1}(n̂″)
