(a)
e_{20}
e_{200} (long session)
$\varpi(A)$ vs tail
open: chron
Simulated exposure (%)
Markov prediction (%)
(b)
simulated (tail)
chain, exact $\Delta\varpi_A$
first order
Δ long-run exposure (pp)
Score tilt ε toward $L_c = 1$
(c)
simulated (tail)
thm:perturb(c), base chain
first order
Long-run exposure (%)
Replacement probability ε
General
Jewish interest
Middle East
Conspiracy-adj.
